

051217NO SHUTDOWN
by Dustin Houghton

100 days went by fast but in the few days leading up to the mark the enemy fake news media rallied for a government shutdown. Each news station would say that for one reason or another a Trump budget would not pass in the senate. These people push fake news every day but as soon as they are shown to have proven themselves disconnected fools time after time they carry on as if they hadn't spent large chunks of the week before bitching about something that wasn't even very possible of happening to begin with. Thank you for a working machine Donald Trump you keep railing into these evil fuckin' lizards and we'll keep cheering you on!
